Easy diy paper craft ideas

Spruce crafts use cookies to provide a great user experience. Using spruce craft, allow our use of cookies. In this project, we will show you how to make a simple paper card at home. In this project you need: - paper - scissors - pen - ribbon - ruler - eraser - compass square (10cm x 10cm) to mark half of each side! Make half a circle on both sides! Attach different color rectangles to the shape! Turn around! Place half circles on each side. Write down what's good for your loved ones (different colors). Put text and circles inside the card to close! When you add ribbon ribbons, you're done! You have learned how to do beautiful cards.) If you like this project, perhaps you will like some of my others. Check them out at: Craft 101 at HowStuffWorks is a destination for ArtParticipated craft made from paper craft. Kids can enjoy making masks, hats, baskets and other paper crafts. Page 2 recycling has become a ubiquitous part of modern society, and it's hard to remember when all the material was disposed of in the same trash can. However, it's important to remember that while recycling is important, it's third on the list of ways to reduce waste. The popular sayings of reduction, reuse and recycling are there for a reason. The best way to help the environment is to reduce the amount of waste. Reuse is number two before throwing things in the recycling bin, and as you know, it can be the funniest way to live an environmentally friendly life. One person's trash may be another's treasure, but for these 10 cunning ideas, one person's recycling could be your next art project. If the content is like most homes in your house, you will probably go through a lot of cereal boxes every week. Recycling is a good idea, but we're turning some of them into handy office file boxes. You can do Martha Stewart for this one. All you need to do is take the cereal box and cut the top part at a diagonal angle on both sides with a utility knife. When you're done, wrap the box with decorative or contact paper, and you'll have a paper file folder. Large boxes are suitable for books, and small boxes are best suited for papers and magazines. Advertising projects are simple and can really help you keep your home in order. If you have an old glass jar ready in the recycling bin, go ahead and get it out. It also needs 2-4 inch pieces of wood and a handful of wood screws. Take out the lid of each jar and screw it into the middle of the wooden plate, apart from a few inches apart. Then mount a piece of wood on the underside of the shelf with some lee back under the wooden shop. Mix screws and nails, nuts and bolts, washer, or anything else that can fit - fill the jar with whatever you want. Then, all you have to do is screw the jar into the lid ad fitted with the amount of information available in Nowadays, you may have a hard time finding use for phone books that have dropped on your front porch once a year. Recycling is a good idea, but so I'm turning it into a cunning Christmas decoration. All you need is some time and some green spray paint. And the good news is, this guy keeps the kids busy for a while and it's incredibly simple. Just sit the kids down with a phone book and fold the top corner of each page diagonally under the spine. This allows the cone shape to stand upright on its own as the book begins to materialize and each page folds. Spray the book green and add some small decorations and you have a cunning, handmade tabletop Christmas tree. Advertising If moms and dads sometimes enjoy a bottle of beer, the kids are all prepared for a cunning project to turn that bottle cap into refrigerator art. Collect hats and get sticky glue, small magnets, decorative paper, sequins and beads, transparent sealants. Use the branch as a guide to cut a small round piece of background paper with a utility knife. Clue inside the hat, then decorate the rest with beads, sequins and small decorations. Each piece is glued to paper, then brushed inside with a transparent sealant. When everything dries, attach the magnet to the back and place it in the nearest refrigerator. Advertised for this project, all you need is some glass jars, aluminum foil, toothpicks, tape and tea light candles. When the jars are clean and dry, each is wrapped in aluminum foil and the sides are taped. Then it's time to get creative. Use a toothpick to drill holes in any design. When placed side-by-side, it can be a picture or a large letter that spells words. After dark, place a tea candle on the bottom of the jar and light up the fire. The result is less personalized glowing lighting and less glass to recycle. Advertising plastic spoons is great for family picnics, but chances are they end up in recycling bins, or worse, rubbish after the fun is over. The next time you have a picnic, save that spoon and wash it for some craft time. With a spoon, all you need is some colored construction paper and glue. Cut the strips of paper half an inch wide and fold them back and forth until you have accordion-like elastic legs and arms. Attach the arms and legs to the spoon, then decorate the head with eyes, hair and mouth. The result? Use as a wooden decoration, good spoon people. This insidious project of advertising can be a lot of fun to create, and at the same time teach kids a little history lesson. The good news is that all you need is two plastic bottles of equal size, two hole buttons, some clear tape and colored sand. Take the lid from the bottle and find a 2 hole button that fits tightly in your mouth. Add colored sand to a bottle, then place the button on the opening. Then you need to take out another empty bottle, place it on top of it, tape it and seal it tightly. Now you're ready to use the hourglass. Measure the time it takes to completely empty the sand from one bottle to another and explain to your child how the initial timer works. If there's one thing advertising kids love, it's colored sand. They go crazy for stuff. This project is a good bet for a good time. Take a glass jar, wash it and let it dry. Then gather the different colors of sand together in your local craft. Let the kids layer the sand with different colors, tilting the jar to show the technique of forming a new color pattern inside. Or put a stick through the sand to create more patterns. When the jar is full, screw in the lid and walk wherever you need a little fun and colour at home. Small jars can be placed on the top of the windowsill, and large jars make great garden art. Advertising babies seem to outdo their clothes every few months, which means that those lovely, teenage little baby socks won't be in use for a very long time. So here's a cunning project that gives them a second life. Ribbons, embroidered hoops, some color felt, beads to fill socks, beans or fiber peeling everything works well. Decorate each sock with different colors and shapes of felt, gooey eyes, and anything else that suits your fancy. Once the socks are decorated, fill them with the filling of your choice and tie them tightly with threads and ribbons. Hang your socks to various lengths in embroidery hoops and

you have yourself a baby socks mobile. This insidious project advertised also involves using those leftover bottle caps, as well as getting into mother nature. Acrylic paint and brushes, bottle caps, strong wires and various decorations are required. The harder the Y-shaped edging and wood, the better. Here it is very simple. First, decorate the stick and add beads, feathers or sequins as desired to paint in colors that will please you. If the stick is nice and colorful, spoil the cap flat, pierce the center of each cap with your nails and tie it together between the Y's using a wire. Now you have a homemade tambourine and all you need is earpld ears. Do you know how to make jewelry from recycled materials?
